# 01 | Introduction

## WHAT IS THE STORY FORGE?

The Story Forge is a communal lounge space within the exhibitor hall that brings participating Narrators and Voice Actors together in one shared area. Instead of individual booths, this space highlights the collective talent of our audio creators and creates a welcoming environment where connection and conversation feel natural.

We've always believed that the magic happens when we look at what already exists and imagine how it could feel richer, more meaningful, and more connected.

## Grand Ball Room

As we continue shaping this new kind of experience, Narrators and Voice Actors join us without a participation fee. Instead, we ask for a handful of commitments that help us create something truly fulfilling for everyone involved.

**Assistant Badge** (limit 2) = \$75

## Logistics

Each Story Forge participant will receive a lanyard indicating they are a Narrator/Voice Actor, their own cocktail table, a table sign with a QR code, and a chair.

Story Forge participants are encouraged to mingle within the forge, but can be at their table if they wish.

Participants are permitted to walk around, handing out info or items within The Story Forge, and are not restricted to just their display table.

Participants may bring floor signage. Size is restricted to 33" wide. We highly recommend retractable signage given the open flow and traffic this area is likely to see.

# Considerations & Layout

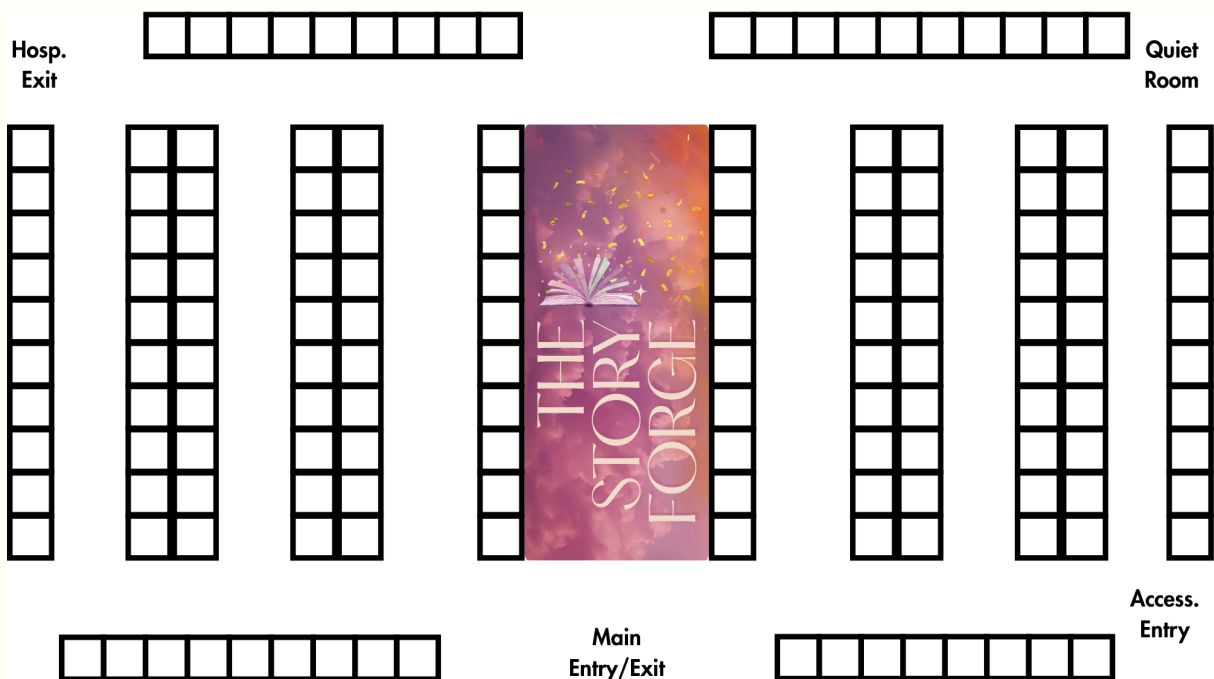

\*layouts and final details are subject to change

## Primary Objective

1. Increase foot traffic through The Story Forge by
  - a. making it a focal point of the convention hall
  - b. incorporating seating so attendees want to come here to rest

## Added Benefits

- Added convention hall seating that didn't previously exist in prior iterations of the layout
- Decreases the need to exit the convention hall in order to rest.
- This space is carpeted with acoustic ceiling tiles which increases the likelihood that attendees will remain in the convention hall and utilize the seating within the forge.
- It's for everyone. While Narrators and Voice Actors consider this space their "booth", other exhibitors are welcome to visit and take breaks in The Story Forge as well as the Arcanum Hospitality room.

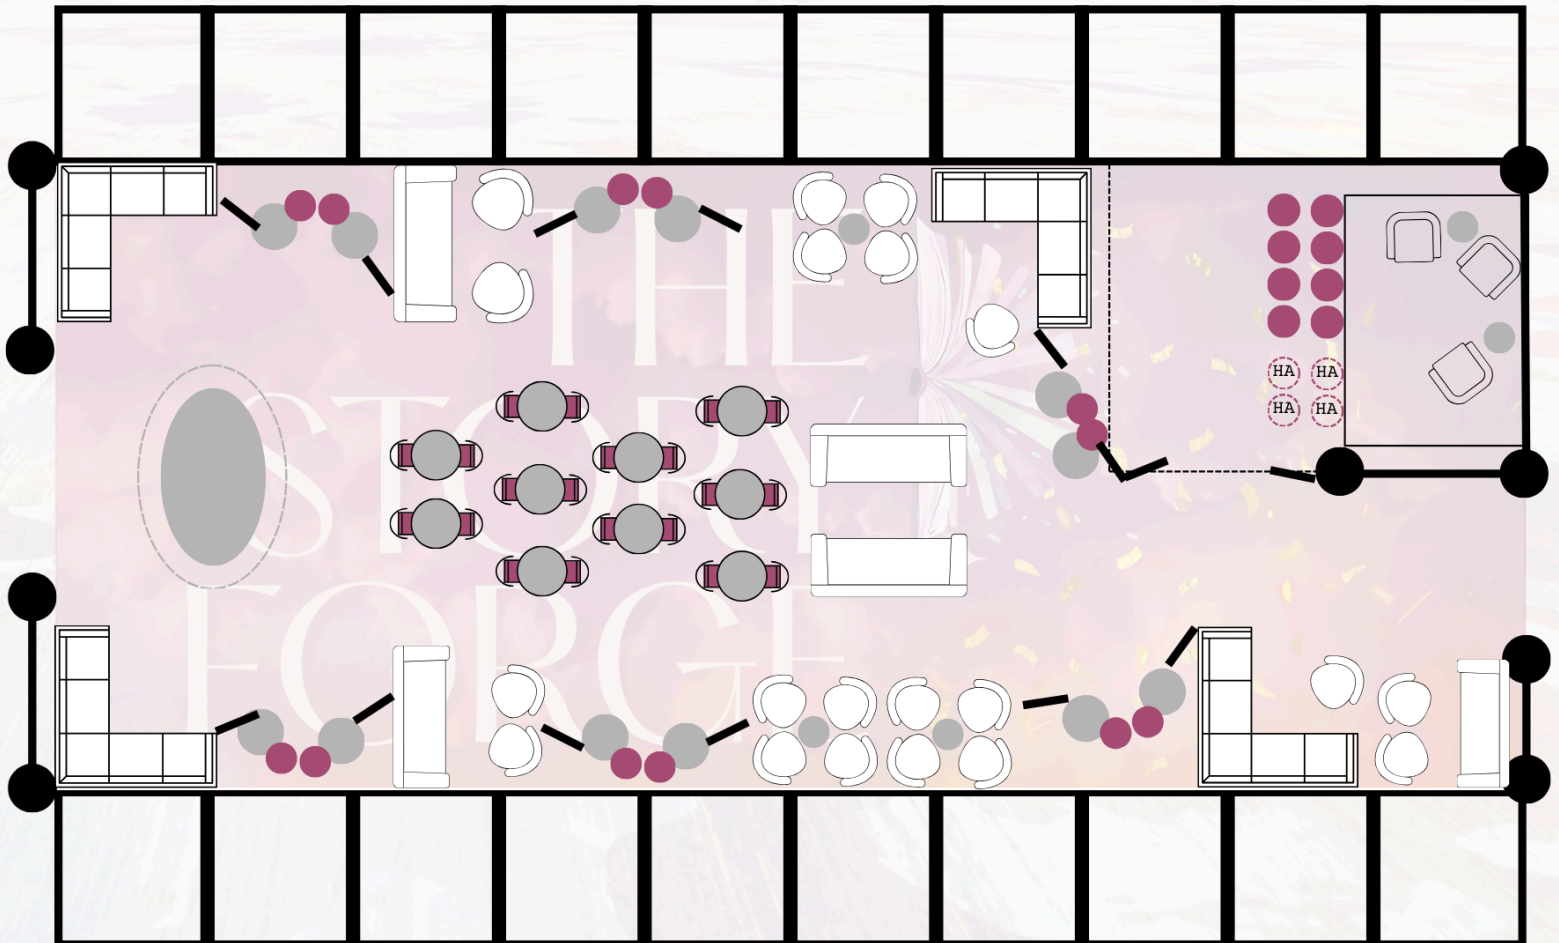

# The Story Forge Layout

\*layouts and final details are subject to change

## Important Notes

- All booths are 10x10
- There will be pipe and drape backdrop along each side with booths and behind the live interview space
- This space measures approx. 40x100 and is not drawn to scale with 100% accuracy.
- Our goal was to add as much functional seating as possible to encourage utilization of this space but final seating choices and quantity are subject to change.
